

Market Appraisal: The £660,000 Offer — Wolves Lane, London N22

Property: 3-bed terraced freehold, Wolves Lane, London N22 5JD · stated 160 sqm · purchased **£580,000 (2015)**.

Current position: marketed "offers over £675,000"; **accepted-level offer £660,000, chain-free**, negotiated up from an initial £600,000.

Prepared 2026-06-04 · Source: PropertyData — HM Land Registry sold prices, portal asking listings, market indices. All data pulled 2026-06-04.

This appraisal states only what the data shows. Every figure is sourced. No figure is included to persuade; the conclusion is whatever the evidence supports.

1. The offer, in one line

The £660,000 offer is **£60,000 (+10%) above the median sold price for 3-bed terraced/semi houses in the subject's own postcode sector (N22 5: median £600,000)**, comes from a **chain-free** buyer, and was negotiated up from £600,000. It is **above the sector median and higher than 14 of the 19 comparable sales** in the subject's sector — the upper end of what these homes actually complete at.

2. The subject's own market history (the strongest single evidence)

This house has already been tested at a higher price — twice:

Listing	Price	Time on market	Result
Two separate agents, same price	£699,950	234 days	No sale — neither agent found a buyer
Current agency	£675,000 (offers over)	44 days (listed 23 Feb → agreed 8 Apr 2026)	£660,000 offer secured (chain-free), now SSTC

The property's own track record is unambiguous: **marketed at £699,950 by two separate agents, it attracted no buyer across 234 days; repriced to a realistic guide, it produced a £660,000 chain-free offer within 44 days (listed 23 Feb 2026, sale agreed 8 Apr 2026)**. Two agents at the same ~£700,000 price could not find a buyer — this is the market's direct verdict on *this specific house*, not an inference from other properties.

(Note: the property was marketed at £699,950 by two separate agents and did not sell at that price. It is the same property, not a comparable.)

3. Where £660,000 sits against SOLD evidence

Comparable completed sales — 3-bed, terraced + semi-detached, within 1 mile, last 24 months:

Benchmark	Figure	£660,000 vs it
N22 5 sector median (subject's own sector, n=19)	£600,000	+ £60,000 (+10%)
Price-band median £600–720k (n=14)	£645,000	+£15,000
Trailing-12-month band median (n=4)	£615,000	+£45,000

Benchmark	Figure	£660,000 vs it
Same street — 67 Wolves Lane (3-bed, May 2025)	£672,000	–£12,000
Same street — 45 Wolves Lane (Jan 2025)	£640,000	+£20,000

➔ Against every location-appropriate sold benchmark, **£660,000 is at or above the market** — and within touching distance of the only same-street 3-bed sale (£672,000).

4. The £720,000 aspiration, tested against data

3-bed terraced/semi within 1 mile, by postcode sector (sold, 24 months):

Sector	n	Median sold	Range	Sold ≥£700k	Avg distance
N22 5 (subject)	19	£600,000	£235k–£785k	3 of 19	0.49 mi
N22 6	10	£719,000	£458k–£805k	6	0.89 mi
N22 7	4	£860,000	£822k–£912k	4	0.86 mi
N22 8	6	£796,250	£640k–£920k	4	0.64 mi

What the data shows, stated precisely:

- £700k+ sales **do** occur within a mile — but they are concentrated in **N22 6, 7 and 8** (Alexandra Park / Bowes Park / Bounds Green), 0.64–0.89 mi away, which are **higher-value sectors** with median 3-bed sold prices of £719k–£860k.
- In the **subject's own sector (N22 5)**, the median is **£600,000** and only **3 of 19** sales reached £700k+ — those being a semi-detached (£765,000, Sylvan Avenue) and two houses 0.70 mi away (Gathorne Road £725,000; Ellenborough Road £785,000). On Wolves Lane and its immediate surrounds, the sold figures are **£640,000 and £672,000**.
- A £720,000 sale would place the subject **+£120,000 (+20%) above its sector median** and beyond all but the top ~10% of its sector — a level the house already failed to reach across 234 days and **two separate agents** at £699,950.

➔ **The data does not support £720,000 for this house in this location.** £700k+ is a different-sector outcome; the subject's own market test confirms it.

5. The live market right now

PropertyData demand, N22 (pulled 2026-06-04):

Indicator	Reading
Demand rating	Buyer's market
Months of inventory	12.5
Average days on market	380
For sale / sales per month	241 / ~18 (8% turnover)

For-sale comparables (3-bed terraced/semi, ≤1 mi, £600–£720k asking, **subject's own two listings removed**, n=23): median asking **£650,000** (range £600k–£700k). Of these, the £700k asking listings include homes sitting **72–206 days** unsold.

➡ Supply is high, sales are slow, and pricing power sits with buyers. Asking prices (seller hopes) cluster at £650,000 — **below** the £660,000 already offered.

6. The money — net proceeds and the 2015 purchase

Item	Amount
Sale price	£660,000
Agent commission 2% + VAT (£13,200 + £2,640)	–£15,840 (2.40%)
Net after commission	£644,160
Est. legal/conveyancing	≈ –£1,750
Net proceeds	≈ £642,410
Purchased 2015	£580,000
Net gain after commission	£64,160 (≈£62,410 after legal)
Return over ~11 years	13.8% nominal ≈ 1.18%/yr

(No CGT if this is a primary residence; CGT would apply if it is an investment property — to be confirmed by the owner.)

7. The cost of holding out for more

Mortgage rates (PropertyData, Mar 2026): 2-yr fix **4.45%**, 3-yr fix 4.37%, SVR **6.60%**. Interest cost while holding (balance unknown — scenarios):

Remaining balance	@ 4.45%	@ 6.60%
£250,000	£927/mo	£1,375/mo
£300,000	£1,112/mo	£1,650/mo
£350,000	£1,298/mo	£1,925/mo

In a market averaging **380 days to sell**, a 6-month hold at a £300,000 balance costs **£6,675–£9,900** in interest alone. To net more than £660,000 the owner must achieve **above £675,000** — a price this house failed to attract in 234 days. Each £15,000 of additional sale price nets only **£14,640** after the 2.40% commission on the increment, against months of carrying cost, the loss of a chain-free buyer, and a buyer's market.

8. What the data supports

Factor	Direction
£660k vs subject's own sector median (£600k)	+10% — above market
£660k vs in-band sold median (£645k)	+£15k — above market
£660k vs same-street 3-bed (£672k)	within £12k — consistent
Marketed at £699,950 by two agents	234 days, no buyer — £700k unachievable for this house
£720,000 target	+20% over sector median; no supporting sale in-sector/in-location

Factor	Direction
Market conditions	Buyer's market, 12.5-mo inventory, 380-day average sale
Buyer quality	Chain-free
Net to owner	£644,160 (after commission); £64,160 gain over 2015
Cost to hold for a higher price	£6,675–£9,900 per 6 months interest; uncertain, unsupported upside

The evidence supports accepting the £660,000 offer. It is above the median sold price in the subject's sector and price band, consistent with the same-street 3-bed sale, and represents a £60,000 (+10%) improvement on the opening £600,000 position. The £720,000 aspiration is contradicted by the property's own failure to sell at £699,950 across 234 days and two separate agents, and by N22 5 sold evidence (median £600,000). In a buyer's market averaging 380 days to sell, a chain-free offer £60,000 above sector median, banking a £64,160 net gain over the 2015 price, is the outcome the data backs.

9. Data limitations (stated for completeness)

1. Stated floor area (160 sqm) is unverified; it does not change the location-based conclusion.
2. Mortgage balance is unknown — carrying-cost figures are scenarios.
3. CGT status (primary vs investment) unknown.
4. 1-mile radius spans mixed-value sectors; the analysis weights the subject's own sector (N22 5) and street, and labels higher-value-sector sales explicitly rather than blending them.
5. Same-street sold sample is small (2 houses); the sector sample (n=19) and band sample (n=14) are the broader anchors.
6. Asking figures are seller hopes and are reported separately from sold evidence.

市场评估：£660,000 的报价 — Wolves Lane, London N22（简体中文）

物业：3 卧排屋永久产权，Wolves Lane, London N22 5JD · 申报 160 平方米 · 2015 年以 £580,000 购入。

当前情况：以 "offers over £675,000" 挂牌；**已达成水平的报价 £660,000，无连环链**，由 £600,000 谈判上调而来。

报告 2026-06-04 · 来源：PropertyData —— HM Land Registry 成交价、门户要价、市场指数。所有数据调取于 2026-06-04。

本评估仅陈述数据所示。每个数字均有来源。无任何数字为说服而列入；结论由证据决定。

1. 报价，一句话

£660,000 的报价比标的所在邮区（N22 5：中位数 £600,000）3 卧排屋/半独立的成交中位数 **高 £60,000 (+10%)**，来自**无连环链**买家，且由 £600,000 谈判上调而来。它**高于标的所在邮区 19 笔可比成交中的 14 笔**，并高于该邮区中位数——处于这些房屋实际成交价的高端。

2. 标的自身的市场历史（最强单一证据）

这套房子已在更高价位上被测试过——两次：

挂牌	价格	在售时长	结果
两家不同中介，同一价格	£699,950	234 天	未售出——两家中介均未找到买家
现中介	£675,000（高于此价竞标）	44 天（2 月 23 日挂牌 → 4 月 8 日达成）	取得 £660,000 报价（无连环链） ，现 SSTC

物业自身的记录明确无误：**由两家不同中介以 £699,950 挂牌，234 天内无人接手；调整为现实指导价后，在 44 天内便产生了 £660,000 的无连环链报价（2026 年 2 月 23 日挂牌，4 月 8 日达成销售）**。两家中介在约 £700,000 的同一价位上都找不到买家——这是市场对这套具体房子的直接裁决，并非由其他物业推断而来。

（注：该物业由两家不同中介以 £699,950 挂牌，且在该价位未能售出。它是同一物业，并非可比。）

3. £660,000 相对成交（SOLD）证据的位置

可比完成成交——3 卧、排屋 + 半独立、1 英里内、近 24 个月：

基准	数值	£660,000 相对它
N22 5 邮区中位数 （标的所在邮区，n=19）	£600,000	+£60,000 (+10%)
价格区间 £600–720k 中位数（n=14）	£645,000	+£15,000
近 12 个月区间中位数（n=4）	£615,000	+£45,000
同街 —— 67 Wolves Lane（3 卧，2025 年 5 月）	£672,000	-£12,000
同街 —— 45 Wolves Lane（2025 年 1 月）	£640,000	+£20,000

➡ 相对每一个与区位相符的成交基准，**£660,000 都处于市场水平或之上**——并与唯一的同街 3 卧成交（£672,000）相差无几。

4. £720,000 的期望，用数据检验

3 卧排屋/半独立，1 英里内，按邮区段（成交，24 个月）：

邮区段	n	成交中位数	全距	成交 ≥£700k	平均距离
N22 5 (标的)	19	£600,000	£235k-£785k	19 中 3	0.49 英里
N22 6	10	£719,000	£458k-£805k	6	0.89 英里
N22 7	4	£860,000	£822k-£912k	4	0.86 英里
N22 8	6	£796,250	£640k-£920k	4	0.64 英里

数据所示，精确陈述：

- £700k 以上的成交在 1 英里内**确实存在**——但集中于 **N22 6、7、8** (Alexandra Park / Bowes Park / Bounds Green)，距 0.64–0.89 英里，属**更高价值**的邮区段，其 3 卧成交中位数为 £719k–£860k。
- 在**标的自身的邮区段 (N22 5)**，中位数为 **£600,000**，仅 **19 中 3** 笔成交达到 £700k 以上——分别为一套半独立 (£765,000, Sylvan Avenue) 与两套距 0.70 英里的房屋 (Gathorne Road £725,000; Ellenborough Road £785,000)。在 Wolves Lane 及其紧邻区域，成交数字为 **£640,000 与 £672,000**。
- £720,000 的成交将使标的 **高出其邮区段中位数 £120,000 (+20%)**，并超越其邮区段约前 10% 以外的全部——而这一价位，该房经 **两家不同中介** 以 £699,950 挂牌、历时 234 天已未能达到。

➡ **数据不支持这套房子在此区位达到 £720,000。** £700k 以上属于不同邮区段的结果；标的自身的市场测试已予证实。

5. 当下的实时市场

PropertyData 需求数据，N22（调取于 2026-06-04）：

指标	读数
需求评级	买方市场
库存月数	12.5
平均在售天数	380
在售 / 每月成交	241 / 约 18 (去化 8%)

在售可比（3 卧排屋/半独立，≤1 英里，£600–720k 要价，**已剔除标的自身两条挂牌**，n=23）：要价中位 **£650,000** (£600k–£700k)。其中 £700k 要价的房源包含滞留 **72–206 天**未售者。

➡ 供应充足、成交缓慢、定价权在买方。要价（卖方期望）集中于 £650,000——**低于**已获得的 £660,000 报价。

6. 资金 —— 净所得与 2015 购入价

项目	金额
售价	£660,000
中介佣金 2% + VAT (£13,200 + £2,640)	-£15,840 (2.40%)

项目	金额
扣佣后净额	£644,160
预估律师/过户费	≈ -£1,750
净所得	≈ £642,410
2015 购入	£580,000
扣佣后净收益	£64,160 (扣律师费后约 £62,410)
约 11 年回报	名义 13.8% ≈ 每年 1.18%

(若为自住主居则无 CGT；若为投资房则涉 CGT —— 由业主确认。)

7. 坚持等待更高价的成本

按揭利率 (PropertyData, 2026 年 3 月)：2 年固定 **4.45%**、3 年固定 4.37%、浮动 **6.60%**。持有期间利息成本 (余额未知——情景)：

剩余余额	@ 4.45%	@ 6.60%
£250,000	£927/月	£1,375/月
£300,000	£1,112/月	£1,650/月
£350,000	£1,298/月	£1,925/月

在平均 **380 天**才能成交的市场中，按 £300,000 余额持有 6 个月，仅利息就需 **£6,675–£9,900**。要在净额上超过 £660,000，业主须实现 **高于 £675,000** 的售价——而这套房子在 234 天内未能吸引到该价位。售价每多 £15,000，扣除增量 2.40% 佣金后仅净增 **£14,640**，却要对冲数月持有成本、失去无连环链买家、以及买方市场。

8. 数据所支持的结论

因素	方向
£660k vs 标的所在邮区中位数 (£600k)	+10% —— 高于市场
£660k vs 区间成交中位数 (£645k)	+£15k —— 高于市场
£660k vs 同街 3 卧 (£672k)	相差 £12k 以内 —— 一致
由 两家中介 以 £699,950 挂牌	234 天, 无买家 —— 该房 £700k 不可达
£720,000 目标	高出邮区中位数 20%； 本邮区/本区位无支撑成交
市场状况	买方市场、库存 12.5 个月、平均 380 天成交
买家质量	无连环链
业主净所得	£644,160 (扣佣后)；相对 2015 收益 £64,160
等待更高价的成本	每 6 个月利息 £6,675–£9,900；上行不确定且无支撑

证据支持接受 £660,000 的报价。 它高于标的所在邮区与价格区间的成交中位数，与同街 3 卧成交一致，并较 £600,000 的起始位置改善了 £60,000 (+10%)。£720,000 的期望被该物业经两家不同中介以 £699,950 挂牌、

历时 234 天未售、以及 N22 5 成交证据（中位数 £600,000）所否定。在平均 380 天才能成交的买方市场中，一个高出邮区中位数 £60,000 的无连环链报价、相对 2015 购入价锁定 £64,160 净收益，是数据所支持的结果。

9. 数据局限（为完整起见列出）

1. 申报楼面面积（160 平方米）未经核实；其不改变基于区位的结论。
2. 按揭余额未知——持有成本数字为情景估算。
3. CGT 性质（自住 vs 投资）未知。
4. 1 英里半径横跨不同价值邮区段；分析以标的自身邮区段（N22 5）与街道为权重，并明确标注更高价值邮区段的成交，而非将其混合。
5. 同街成交样本小（2 套）；邮区段样本（n=19）与区间样本（n=14）为更宽的锚点。
6. 要价为卖方期望，与成交证据分开列示。

本文件夹内审计文件：`scan_sold.json`、`scan_sold_psf.json`、`scan_asking.json`、`scan_mortgage_rates.json`、`scan_demand.json`。
